

All weather, Zero Maintenance
Exterior Louvers !

LEBEN

WOOD POLYMER COMPOSITE

A unique multilayer fusion that offers the warmth of wood and resilience of plastic. Manufactured from high quality polymer resins and hardwood fibres, WPC is truly a remarkable combination of nature and technology, designed to offer the same aesthetic and physical properties of hardwoods with none of the drawbacks and limitations of real timber. With no need to apply regular coats of staining and sealing materials to prevent rot and decay, LEBEN ultimaFLUTE cladding performs magnificently for years to come with practically no maintenance costs.

ultimaFLUTE cladding is not just a beautiful alternate to real wood, it provides a cost effective, highly durable and eco friendly option for the discerning and environmentally conscious customer. Engineered from an innovative composition of upto 60% FSC® certified reclaimed wood from post-industrial manufacturing and 20% recycled polyethylene that leaves a minimal impact on the environment. With a lighter carbon footprint, unique aesthetic appeal and superior performance, Wpc is highly sustainable and definitely a material of the future.

INNOVATIVE

We've invented a whole new way to make facades stunning & distinctive with composite cladding that's beautiful, durable and affordable

HIGH PERFORMANCE

Unlike wood, our cladding resists warping, rotting, fading and almost anything mother nature has in mind.

COST EFFECTIVE

In our constant endeavour to offer products that are durable and affordable, our cladding totally mimics real wood and yet is much cheaper in cost and maintenance

BUILT TO LAST

We have created the most advanced composition and used the latest Co-Extrusion technology to ensure our cladding last for decades.

PEACE OF MIND

Our 5 Years replacement warranty and upto 20 Years lifetime assurance means you're covered and confident for years to come.

ECO FRIENDLY

We manufacture cladding that's an innovative blend of 80% recycled wood and plastic. And that's just the start of our sustainable way of life.

Composite Louvers with CoEx weather Shield

Wrapped in a protective shell, the ultimaFLUTE composite cladding provides you with not just the benefits of wooden claddings but a lot more. The board's protective polymer sleeve is designed to offer outstanding resistance to staining and fading, while the board's blend of double toned colouration provides bundles of character. It's these key features that make our CoEx cladding the premium choice for any project.

EL26# CoEx Teak

Boasting superior stain and fade resistance, the CoEx weather shield coat is built to withstand the harshest weather conditions. With natural subtle variances, the ultimaFLUTE boards mimic the look of natural timber, a step forward in composite technology. Transform the look of your facades with the ultimaFLUTE range that is specifically made for Indian conditions.

EL26# CoEx Ipe

CLADDING THAT STANDS THE TEST OF TIME

ultimaFLUTE has a unique character that perfectly imitates real wood. The surface of the board has irregularities that catch the light and give it rhythm. This board has a new co-extrusion hard cap that is highly resistant to stains and uv rays. The protective layer is hard and limits abrasion and envelopes it from all four sides to ensure protection. ultimaFLUTE does everything a good cladding should: stay splinter-free, keep its color for years and clean up easily, no matter what nature has in mind.

Warranty

A densely packed composite core concealed in a hardy outer shell, the ultimaFLUTE cladding provides absolute peace of mind to those seeking a weather resistant wooden cladding solution that stands the test of time. Strength, durability and weather resistance are not the only things this board has in its locker. An exceptionally authentic finish is guaranteed to provide your facades with a distinct identity and a premium feel.
